Social Change: Part IV

Social Change of the Fourth Kind is the most dramatic and dynamic; and the most volatile. It is a shift not only within the existing paradigm, but that shift precipitates and occurs in conjunction with a shift between paradigms. Sometimes the transition is fostered by outside forces. Consider for example, the so-called 'Discovery of The New World' from the perspective of the indigenous people, or the effect of high volume international immigration upon local communities over the last three decades, or the fall of the former Soviet Union and the move towards a

Capitalist economy in Russia from the perspective of the Russian People. Now magnify these events to a global scale. We are no longer simply creating change directly and wittingly. Today the very nature of the technologies we have engineered and infused into the Global Society are precipitating unexpected changes, latent effects; powerful social forces driving social change under the influence of their own inertia and dynamic interactive tendencies. Creativity, intuition, instinct, adaptability, flexibility, and insight are essential qualities and characteristics for those who survive and progress.

At SEI, "*We Transform Information Into Insight!*" so that you can develop those qualities. No cultural metaphor is ignored as a possible tool to stimulate you to explore the deeper levels and numerous corridors of human consciousness. We know that you come into the world as 'pure potential', and although suppressed and constrained by the hypnosis of social conditioning; that potential is

sitting there waiting for you to discover a path to its door. Demographic transitions, technological advances, international political policies, and geopolitical changes are stretching the 'old world order' beyond its natural limits. We are entering into a 'new world order' where individual and corporate survival will depend on 'unlocking higher levels of human potential in ourselves and in our employees.

Social Change: Summing It Up!
